

**Service Learning Conference**  
**"Current Status and Future Prospects of Service Learning"**  
Bethlehem, Palestine, May, 2023

**Workshop**

**Successes and Failures in Service Learning Practice**

We would invite teachers/students/administration staff from our hub to take part in sharing experiences workshop. The presentation of one case study should take about **10 minutes**. The workshop will take 1,5 hours, including presentations and discussion/reflection.

This workshop aims to explore the successes and failures of Service Learning (SL) practices through sharing experiences, challenges, and case studies. Participants will discuss the implementation of SL, institutionalization, development systems, and building awareness. The workshop poses several critical questions about the needs of teachers, students, and communities, and the best SL projects at their universities. Participants will reflect on their experiences and learn from both successes and failures. The workshop will also explore the implementation of SL at different universities, including the structure, functioning, and official documentations. Additionally, the workshop will delve into how to build awareness about SL at universities and the main challenges that they currently face.

We kindly ask participants to prepare the following questions:

- tell us about your experiences in SL, case studies
- what are the most important needs? of teachers/students/community
- what can we learn from it?
- the best SL projects at your university
- the biggest failure in SL - what can we learn from it?
- reflection - how do you work on it?
- how implementation of SL looks at your university?
- how does it work now?
- how system looks?
- how did you work on official documents? what are the solutions, tools, tips...?
- the level of awareness about SL at your University? how to build it?
- what are your main challenges now?
